TOBY CHURCHILL

communication aids for people who cannot speak

IN BRIEF: Lightwriter SL35 (DECtalk®) and Lightwriter SL38 (Acapela)

Press On/C to turn on

Full details of operation in the Manual LIT403RF

You should also have a QUICKREF **LIT501QK**

MEM

- The MEM-key has many uses:

MEM	this level is for recalling memories.
MEM-MEM	this level is for saving memories.
MEM-MEM-MEM	this level is for executing functions.

- For example:

MEM-1 is 'AND'	overwrite it, if you want.
MEM-P is 'WOULD YOU PLEASE'	overwrite it, if you want.
MEM-5 is a list of memories	all memories are backed up to a secure internal device.
MEM-X is 'empty'	you can store up to 36 'Direct-Memories', plus Abbreviation-Expansions.
MEM-zero is 'louder'	you could overwrite it, as it is always available in setups (see below).
MEM-MEM	save whatever is on the screen.
MEM-MEM-MEM-H	enter the help-system

SETUPS

- You can adjust the Lightwriter in many ways, from the everyday to the specialised. Examples:

Everyday

|	
Volume	select the speech-volume.
Voice	select Male or Female.
Speak: Word	"speak each time I press Space".
Speak: Replay	"don't speak until I press Replay".

Specialised

Port	configure the serial-ports (2 on 35, 1 on SL38).
Pitch	select the pitch of the voice.
Speak: Key	spoken confirmation of keys (for learning-disabilities).
Speak: Announce	announce each key when pressed with no action (for low-vision).

USE ALL DAY, CHARGE EACH NIGHT

To get the 'other' symbols, press Shift first

MEMORY

SHIFT

BACK-SPACE

- Press **Replay** to repeat the message. **Shift** then **Replay** to spell the last word.

- Press **Shift** then **Buzz** for an alarm. You can alter the sounds.

Language-change, where purchased (SL38 only)

- Lightwriter SL38 (Acapela speech) can be fitted with more than one language.

- To switch from one language to another, press these keys:

- **MEM** then **MEM** then **MEM** then **L** then **1** then [confirm it]   to load: American-English
- **MEM** then **MEM** then **MEM** then **L** then **2** then [confirm it]   to load: Spanish
- **MEM** then **MEM** then **MEM** then **L** then **3** then [confirm it]   to load: Italian
- **MEM** then **MEM** then **MEM** then **L** then **4** then [confirm it]   to load: French

  - If you load a language that you have not purchased, the Lightwriter will not speak.

  - Having loaded a new language, you may need to change some setups.

  - You can save these changes permanently. The sequence of events is:

    Change the setups to how you would like them (eg: a Female voice)
    Clear the display, type the word BARNWELL
    Save this new "profile" - MEM then MEM then MEM then S then the desired number, then [confirm it]
    From now on, MEM MEM MEM L then the number will load the language with your preferences
